DETAILED ACTION

Response to Amendment

In response to the amendment filed 9/2/2004, claims 9 and 25 are amended. Claims 9-12 and 25 are pending.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 11 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Other than prior art Fig. 1, the only *original disclosure* applicant makes of the semiconductor device being a laser device is in Fig. 14 and the discussion thereof (spec., p. 32 line 9 et seq.). Due to the amendment of parent claim 9, this discussion cannot read on claim 11 as presently claimed (including parent claim 9), and thus the claim as it presently stands is an introduction of new matter.

Parent claim 9 requires that the hole in the substrate extends to the claimed layer. The layer further is required to make electrical connection to the device. The hole is clearly shown in substrate 51, and thus for the hole to extend to the layer and for the layer to provide electrical connection, the layer must be interpreted as 62 of Fig. 14. However, it is impossible for the

device of Fig. 14 to be formed *between* the layer and the substrate as required by the claim. The original disclosure provides no support for the claimed device being a semiconductor laser device, and thus the claim contains new matter. The present claims are only supported by the original disclosure where the device is a FET, such as the device 3, 23 in the other figures. There is no suggestion that a laser may be substituted for device 3

Allowable Subject Matter

Claims 9-10, 12 and 25 are allowed. The following is an examiner's statement of reasons for allowance:

There is not taught or disclosed in the prior art a semiconductor device comprising a non III-V nitride semiconductor substrate having a hole extending therethrough, a device and a layer each formed on a surface of the substrate, the hole extending through to said layer, where the device is disposed between the layer and the substrate and electrical connection to the device occurs via the hole and the layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments filed 9/2/2004 have been fully considered and are persuasive, but a new rejection is made above in light of the amendment.

Application/Control Number: 09/768,912

Art Unit: 2828

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Particularly, previously a liberal construction of the term "on the surface" could have allowed the claimed layer to be layer 60 of Fig. 14, which would have allowed Fig. 14 to support claim 11. However, due to the amendment that the hole must extend to the layer, this is no longer the case. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James A. Menefee whose telephone number is (571) 272-1944. The examiner can normally be reached on M-F 8:30-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, MinSun Harvey can be reached on (571) 272-1835. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
